

## How do students share their My Plan portfolio?

### Parent's Access from Student

Any information students save to their My Plan portfolio can be shared with parents or family members through the [Parent Portal](#). Students can also share their plans by sending an invite link.

To send a Parent Portal link to a parent or family member, students will need to send them a registration code and invitation to join. This task must be completed one email address at a time; however, multiple invitations to parents or family members can be sent.

To send the Parent Portal invite from a student account:

1. [Log into Career Cruising](#).
2. From the main page, click **My Plan**.
3. From the top menu, click **Share My Plan**.
4. On the **Share My Plan** page, click the **Invite Parent/Guardian** link.
5. Enter the **Parent/Guardian Email Address** and click **Send**. Students will receive a notification with the message *Your invitation has been sent*.
6. The parent will receive an invitation email with an Activation Code, which they can then use to create their account on the [Career Cruising Parent Portal](#). The parent/guardian information will be available for Advisors to view and send messages to within CAMS. Students can check messages from their parents/guardians from the **Share My Plan** page by clicking **View Parent/Guardian Comments**.
