

NCNoCo

Are you familiar with the services we provide at NC NoCo?

At the Neurofeedback Clinic of Northern Colorado, licensed mental health therapists provide psychotherapy in conjunction with neurofeedback. Neurofeedback training targets optimal brain functioning by providing real-time feedback to the brain in session. Neurofeedback therapy allows an individual's brain and nervous system to begin to work more efficiently together. Psychotherapy aided by neurofeedback can result in improved stress management, performance at work and school, thought patterns, behaviors, choices, and relationships.

We address issues such as depression, anxiety, insomnia and sleep disorders, autoimmune disorders, ADHD, migraines, autism, PTSD and many other symptoms that originate in the brain.

We'd love to talk with you further on the phone or in person to collaborate on how we can provide services to your clients/staff. Please let us know if you have any questions and when you'd have time to talk.

The Neurofeedback Clinic of Northern Colorado is an in-network provider with Aetna, Anthem BCBS, Cigna, Medicare, Tricare and VA (Veteran's Benefits)
