

JUST THE FACTS: DRUGS, VAPING, AND CULTURE

Teens and Drugs: What Parents Need to Know

Fort Collins High School is hosting a 3-night event for parents to learn more about marijuana, vaping, other substances youth are using, and teen culture. These evenings will provide information on teenage brain development, substance abuse warning signs, and talking tips so that you can engage in open and honest conversations with your teenager.

Lauren Kiel, Bethany Condon, Katelyn O'Grady, and Quinn Hutchinson are the school counselors at the four comprehensive high schools working in the areas of substance abuse prevention and intervention. They will be sharing current and accurate information with families in an effort to keep our students healthy and safe! A light dinner will be provided.

**Fort Collins High
School**

L100

6pm-7pm

January 22, 2020

**Marijuana and the
Teenage Brain**

February 5, 2020
